DESTINATION THAT WE OPERATE WITHIN

OKAVANGO DELTA

One of the few inland deltas in the world now a World Heritage Site, probably the most beautiful and pristine is home to many species of plants and animals. It is a wetland of great natural value and one of the prime wildlife destinations in Botswana. The water comes from distant mountains in Angola and reaches the delta during the dry season.

Today, large areas of the delta are protected with the famous Moremi Game Reserve.

MOREMI GAME RESERVE

Many consider it the most beautiful; reserve in Botswana with great variety of wildlife - part of the Okavango Delta. It is also one of the most popular game reserves. Chief's Camp lies within the Moremi Game Reserve's exclusive Mombo Concession, on the north-western side of Chief's Island – the largest land mass in the Okavango Delta. The island is renowned for some of the best game viewing in Botswana

CHOBE NATIONAL PARK/ SAVUTI

A huge protected area with several different habitats and with the greatest concentration of wildlife in Southern Africa. Home to enormous herds of elephants - some estimate that there might be more than 100.000 elephants in this park. Chobe River Front hosts the largest elephant herds on earth - especially during the dry season. Chobe is the most visited and partly overcrowded park in Botswana - especially the Chobe River frontage. Savuti on the southern area of Chobe National Park is famous for big elephant bulls, lions and hyenas.

NXAI PAN & MAKGADIKGADI PANS NATIONAL PARK

The Makgadikgadi pans national park offers good wildlife viewing, particularly when large herds of zebra and wildebeest begin their westward migration to the Boteti region. Kudu Island, a rocky outcrop near the south-western shore of Sowa pan is one of the most popular destinations in Makgadikgadi. Nxai Pans national park has much larger pans than Makgadikgadi. Common species to be sighted are zebra, wildebeest, springbok, impala, gemsbok, hartebeest, giraffe, lion, cheetah, wild dog, brown hyena, bateared fox, and sometimes elephant and buffalo. Baines Baobab, the seven baobab trees that were immortalized in a drawing by Thomas Baines in 1862 is found in Nxai pan national park.

CENTRAL KALAHARI GAME RESERVE

Central Kalahari game reserve, the second largest game reserve in the world is mostly flat and gently undulating covered with bush and grasses covering the sand dunes, and areas of larger trees. The Deception valley on the northern side of the park is the most popular because of the dense concentrations of wildlife during the rainy season. It is also the most travelled area of the reserve, with a number of public campsites, and proximity to the eastern Matswera Gate.
